SUMMARY

B.Tech Information Technology graduate with hands-on experience in full-stack web development through industry internship and production-oriented projects. Experienced in building web applications using JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, JWT authentication, and AWS. Developed backend APIs, database-driven features, authentication workflows, responsive user interfaces, and CI/CD deployments. Strong foundation in software development, debugging, API integration, database management, and Git-based development.

TECHNICAL SKILLS

- **Languages:** JavaScript, Java, Python
- **Frontend:** React.js, HTML, CSS, REST API Integration
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB, SQL
- **Cloud & DevOps:** AWS (EC2, S3, CloudFront), GitHub Actions, CI/CD
- **AI Integration:** OpenAI API
- **Tools:** Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Detagenix — Full Stack Intern / Project Coordinator

Remote | Mar 2026 – Jul 2026

Boutique E-Commerce Website

- Developed and integrated backend modules and REST APIs for authentication, products, orders, and related e-commerce workflows using **Node.js, Express.js, and MongoDB**.
- Implemented **JWT-based user authentication** with registration and login functionality, and resolved authentication and customer account issues during development and testing.
- Integrated frontend and backend functionality while contributing to login/signup pages, navigation, UI improvements, and **admin dashboard enhancements** using React.js.
- Identified and fixed issues involving customer addresses, hardcoded product fields, database-driven data, and application workflows, improving overall reliability and consistency.
- Coordinated frontend and backend development by assigning tasks, tracking progress, following up on blockers, reviewing implementation progress, and supporting final deployment and testing.

PROJECTS

Udaan – AI-Powered Career Guidance Platform (MERN + AI)

[Live](#) / [Code](#)

- Built a full-stack AI-powered platform providing personalized career guidance and learning roadmaps for students.
- Developed frontend and backend components with **React.js, Node.js, Express.js, and MongoDB**, including API integration and database-driven application features.
- Integrated **OpenAI APIs** to provide interactive AI-powered career assistance and personalized user experiences.
- Deployed the application on **AWS** and implemented CI/CD workflows using GitHub Actions for automated application releases.

Smart OPD – Doctor-Patient Appointment & Consultation System (MERN)

[Live](#) / [Code](#)

- Developed a full-stack healthcare platform for appointment booking, doctor management, patient workflows, and administrative operations.
- Built REST APIs for appointment, patient, doctor, and consultation-related workflows using **Node.js and Express.js**.
- Implemented **JWT-based role authentication** for Admin, Doctor, and Patient access and protected application resources based on user roles.
- Designed application logic for consultation tracking, appointment rescheduling, emergency patient handling, and doctor availability management.

EDUCATION

B.Tech – Information Technology | Indore Institute of Science and Technology, Indore

(2022–2026)

CERTIFICATIONS

- Full Stack Web Development (MERN) – Apna College | Java + DSA – Apna College
- Hackathon Participant (2023): Built a smart Vendor service website in 24 hours
- AWS Cloud Foundations – AWS Academy | SQL & Database Management – IBM
